Tak, a posledný deň rotujúcich programov je za nami.

Posledná skupinka prešla mestom počas AQUA Urban , nasledujúc aplikáciu, ktorá ich povodila po uličkach a výstavách Bratislavu.

Na AQUA Nature si účastníci posledný krát skúsili analýzu vody na časti LAB, a v rámci Služby pomohli v neďalekých Jarovciach prečistiť les.

Skoro pri tom postavili auto, no ved' sa ich spýtajte.

Posledná skupinka si bola na AQUA Flow užiť splav ramien Dunaja až do Maďarska a aj keď jeden z najpamätniejsích zážitkov pre účastníkov bolo možno skákanie do vody, tak miniálne ISŤáci budú mať ešte dlho do pamäte vyriť intenzívne používanú rádiovú komunikáciu "We are sinking".

A na AQUA Move si účastníci posledný krát zojazdili na paddle boardoch, či zahrali iné športy alebo zastrieľali z luku.

To že rotačný program skončil ale rozhodne neznamená koniec. Dnes nás čaká spoločný program, na ktorý sa rozhodne môžete tešiť. Možno aj práve preto, lebo v ňom zohráte rolu väčšiu ako je účastník.

Našťastie nám počasie celkom vyšlo, a aj keď pár krát zafúkalo tak veľmi, že váľalo slnečníky a aj náš stážeň, tak bolo dostatočne teplo aby voda lákala na schladenie.

Po večernom nástupe sme sa ešte presunuli späť do jedálne a vypočuli sme si diskusiu sestry Sestry zo Skautského inštitútu s hostom o našich chránených krajinných oblastiach, ktorá bola poprepletaná tromi kolami kvízu, do ktorého sa zapojili všetci naplno. Dnes večer uvidíme ktorá skupinka vyhrala a ako bude ocenená.

Ftipná pätička

Kde v miestnosti je najteplejšie?

V rôhu. Mô predať 90 stupňov.

AQUA NEWS

Day 5

So, the last day of rotating programs is behind us.

The last group went through the city during AQUA Urban, following the application that led them through the streets and exhibitions of Bratislava. At AQUA Nature, the participants tried water analysis on the LAB part for the last time, and as part of the Service, they helped clean up the forest in nearby Jarovce. They almost built a car while doing so. Just you ask them. The last group was on AQUA Flow to enjoy rafting in the arms of the Danube all the way to Hungary, and even if one of the most memorable experiences for the participants was perhaps jumping into the water, at least the ISTs will have the intensively used radio communication "We are sinking" engraved in their memory for a long time.

And at AQUA Move, participants enjoyed the paddle boards for the last time, played other sports or shot a bow.

The fact that the rotation program is over definitely does not mean the end. Today we have a joint program that you can definitely look forward to. Maybe also because you will play a bigger role in it than just a participant.

Fortunately, the weather was quite good for us, even though the wind blew a few times so much that the umbrellas and also our mast were blown over, it was warm enough for the water to tempt us to cool off.

After the evening lowering of the flag, we moved back to the dining room and listened to the discussion of the siter Sestra from the Scout Institute with a guest about the protected landscape areas of Slovakia and other nature and society coexistence topics. The discussion was split into parts by the three rounds of a quiz, in which everyone could participate. Tonight we will see which group won and how it will be awarded.

Funny footer

What's the warmest place in a room?

The corner. It's 90 degrees.
